

DesAlps Virtual Training Center

The main mission of the DesAlps project is to spread a Design Thinking culture among the innovation system of the Alpine Space area. To reach such an ambitious goal, some Design Thinking Labs will be established in partners' regions and become self-sustainable after the project end. The DT Labs will act as a centralized spot of DT knowledge and will guarantee high quality training on Design Thinking, performed by local and international specialists, for the benefit of companies, individuals and intermediaries. In order to improve the network existing around DT Labs and empower the transnationality of such a model, DT Labs will support, and will be supported, by a Design Thinking community, called DesAlps Virtual Training Center.

Design Thinking Process

The so-called Double Diamond is a good visualization of the design thinking process. The model distinguishes the problem space from the solution space. In both spaces, first new insights and options are worked out (divergent thinking). After that, ideas are evaluated and selected (convergent thinking).

First DT Training Workshop in Ljubljana: “Design Thinking Teaser”

On 13 December the first transnational workshop took place, this time at the CCIS Headquarters in Ljubljana. Combined Italian and Slovenian energy plus a very productive and in-depth discussion resulted in a capacity building upgrade.
